

## Erratum to: Pseudopseudohypoparathyroidism With a Novel Mutation in the GNAS Gene Showing Thin Bones of Extremities and Ossification of Enteses

Hidekatsu Yanai

### Erratum

In article: Hamasaki H, Mukaino T, Kaneko H, Mitsui T, Moriyama S, Hasegawa T, Yanai H. Pseudopseudohypoparathyroidism With a Novel Mutation in the GNAS Gene Showing Thin Bones of Extremities and Ossification of Enteses. J Endocrinol Metab. 2013;3(6):150-152. The authors wish to make the following cor-

rections.

In the section of Case Report, Discussion and Figure 3, we stated a novel mutation in exon 1 (c.137 T > G, L46P) of the GNAS gene. "c.137 T > G, L46P" is incorrect, and "c.137 T > C, L46P" is correct. Although expression of substitution of cDNA was incorrect, expression of substitution of amino acid (L46P) was correct, which means that this correction does not have a great influence on our result. We have provided corrected version of Figure 3.
